

INNOVATION IN ASSET MANAGEMENT PROGRAM

The Innovation in Asset Management Program has been created for organizational leaders and aspiring leaders tasked with leading technical teams and projects in the asset management functions of an organization. The program is also attractive to those who wish to learn the art of innovative thinking to assist in their everyday application of asset management. It will comprise four one hour interactive web-based sessions undertaken over a period of 4 consecutive weeks from the convenience of your desk. Each module can be taken in isolation or as part of the full program. At the completion of the full program of 4 modules a certificate of participation will be issued to participants.

PROGRAM OBJECTIVES

- To understand the context of and need for innovation in asset management including the top 5 technology shifts rapidly changing this
- To learn 10 principles of innovative thinking for application in an asset management environment
- To assist leaders in dealing with cultural challenges and successfully delivering innovations in the workplace
- To learn 8 practical elements of a framework to power an innovative culture and people led breakthrough.

KEY TOPICS COVERED

The program includes four modules, each covering specific topics

MODULE 1: Emerging Innovation in Asset Management

Learning Outcomes:

- Definition of innovation
- The need for innovation in today's context
- The 5 top technology shifts creating the new paradigm for asset management
- How you can position yourself and your organisation for success in this changing context
